

Hotel UV-C & HEPA Filtration Packages

Offering a safe space to stay and dine indoors has become a challenge for hotel owners. High Efficiency LLC has teamed up with CRiMSON Medical to bring you a Disinfection System that is designed to provide staff and guests a space with clean air free of contaminants. The system utilizes UV-C technology and HEPA grade filters, two of the few options that mitigate infectious diseases from the air. Both UV-C and HEPA filters have been tested and proven to eliminate COVID-19. We will design and install a system that will let your customer know that you are open for business with their safety in mind. Our job is to make your facility healthy.

CRiMSON Medical, founded by Dr. Kevin Kelly is the leader in UV-C and HEPA technologies has teamed up with manufacturers CureUV & Austin Air to offer a new approach to hotel disinfection. Our approach provides a solution that will allow your guests and employees to know that when they are in your hotel, the air around them is safe to breathe.
